

a2b Fulfillment and Athens Tech – Truly ‘Work Ready’

a2b Fulfillment, Inc., a Distribution Services provider operating in Greene County since 2003, has recently found success with the State’s Work Ready Program, administered in Greene County by Athens Technical College. Work Ready is a program designed to first test, and then enhance worker skills.

The way it works is....

In order to assist the hiring decision, the company has made a work ready certificate part of the application process. The reason for this, according to Sarah Latz, HR Director for a2b, is that the applicants and employees who have a work ready certificate have proven to possess the skills, aptitude, and attitudes that we’re looking for. We have also found that these workers have higher levels of confidence, are more likely to take initiative, and solve problems quickly. “We will be

successful in Greene County because of the county’s effort to provide the Work Ready assessments through Athens Technical College on the Greene County Campus. We are pleased to be a partner with the campus to have our employees demonstrate the skill level we need now and offer the training we will need as we grow the business.”

a2b Fulfillment, Inc. is a provider of warehousing, order fulfillment, kitting/assembly, and numerous other complimentary distribution support services to companies nationwide. Since its inception, a2b has supported multiple employment programs aimed at helping persons with disabilities and other barriers to employment, including through the State’s Department of Labor Vocational Rehabilitation Program. By participating in these programs the

company has helped workers learn new skills and gain vital work experience.

Continuing with its theme of helping through hiring, a2b has

begun employing individuals in the County who have experienced major life disruptions and are receiving services from the Circle of Love shelter and Atlas.
